

My Testimonial

I am a man of 53 years and would like to share my story with you.

As I had so many manifestations and pains, my GP prescribed me all kind of medication, and even more and more. But I kept feeling myself miserable and so very tired and pain all day long.

I had surgery for lumbal hernia for two times already, but my pain came back soon after, higher up or lower in my spine. Had always pain in my neck, shoulders, wrists, knees and ankles, took boxes of Naproxen and Aleve, got injections, but it did not get better at all. Took all kinds of supplements as Glucosamin and Chondroitin, Shark cartilage, vitamins and minerals, but waste of money.

My doctors and physiotherapist blamed my computerwork, and diagnosed RSI and Artrosis.

I slept bad and went to bed late as I could not sleep in earlier and thought better less sleep than stay awake, being irritated. My wife said I did snore loudly and she even heard that I sometimes stopped breathing and was ofcourse very worried. I went to a specialised clinic where they diagnosed sleep-apnea and received a CPAP device, to prevent that I will stop breathing. Eventough at the day I was still so awful tired, that I had no energy to do sports or hobby's and fell down on the couch after coming home from my work, only able to watch tele.

I had a hypertension of 210 over 140 mm Hg and therefore I had to take in medication and had a salt-less diet, but still my hypertension did not drop lower than 170 over 95 mm Hg. They assumed it was a Familial Essential Hypertension, as my brothers do have the same.

Also I had awful headaches next to my eyes, and red, burning and tearing eyes also in the house. Oftomologist diagnosed Cataracta and surgery was already planned.

But then one of my colleagues recommended me Medisynx Method of Doctor Vink, because his whole family was there and were so very satisfied about their remarkable results. So I made an appointment soon, for blood take and acupuncture treatment on just 1 day.

Directly after 1st acupuncture treatment I felt so much better, relaxer en my blood pressure was dropped to 140 over 82 mm Hg and my pulse pols was only 72 beats per minute, I was so very surprised to achieve so much results at same day, incredible.

My eyes were better, did not see any black spots anymore.

My back, neck, shoulders, wrists, knees and ankles were as NEW, no more pain, and able to move perfectly. And all-in just 1 treatment, amazing!

Her explanation was clear, now you are clean inside, but you go home and will eat, drink and use incompatible food and nutrients again, so it is going wrong again, so this result is only temporal and not permanently now.

That is why we planned a 2nd acupuncture treatment that week and one treatment after I received my BASIS Plus Test testresults.

She explained me, then with your individual diet you will stay clean forever. If you make a mistake you will notice and want to be back soon, as then your manifestations will come back, and we have to plan another cleaning acupuncture. And so it was.

My testresults were not bad, may not complain about, as in meanwhile I heard from my colleague that some people get much more difficult diets. Well it is over for my beer, and many vegetables and spices, but nothing to complain about as I can have a wine and whiskey in stead. Although first I needed to eliminate my Candida albicans, as they determined Systemic Candidiasis, like many people do have too.

For the Candida I received The 4 Step Plan, also developped by Doctor Vink and by retesting we knew when I am Candida-free.

While writing my testimonial I can tell you I am really Candida-free, and I noticed it immediately, as I had no more sugar needs, alcohol hmmm I do not want it anymore, and even like to drink water.

In my head and body I am so clear, calm and relaxed. I can even think better and I can be more concentrated for a longer time without becoming tired, finding my words easily. I do sport twice a week, and still have enough energy. I still do my computerwork, but that is not any problem anymore, no more pains of my back, neck, shoulders, wrists so that was certainly not the cause, despite everybody says.

I sleep in perfectly, have no more snoring neither do I have breathing stops anymore (sleep-apnea) they determined, so now I can even sleep without my CPAP device, very pleasant to sleep freely again, as the elastics did pinch in my face, no more sweating, and no more dragging my device all over the world for holidays.

Well I may conclude my life is so much better nowadays, and wish to share this with you. I really recommend this Medisynx Method treatment to everybody, and please do take it serious.

Thijs K
